

Health Promotion Center

We created the most comprehensive, streamlined health check-up program to ensure thorough head to toe evaluation for the client's health status & for early detection of various diseases and preventive measures for each examinee. Our health check-up program has several packages tailored to the individual.

If any health problems be identified, our comprehensive and experienced team of medical professionals will follow up with you to provide the necessary medical care, help you understand your health status, and—advise you on lifestyle changes or further diagnostic/therapeutic measures offered by our world class professors in each area of specialization.

Utilizing all the expertise of our medical specialists from different discipline as well as state of art equipment, our **Health Promotion Center** provides very comprehensive and individualized health screening programs through a very stream-lined, peaceful process.

In addition to usual health screening programs for Korean citizens, our special programs for **foreign patients** are designed to accommodate the specific health care need of foreign patients from different countries, based on **scientific data** and disease patterns of different, ethnic, cultural, national back grounds. Several different packages are available for needs of individual patients and different medical backgrounds from different sectors of the global community.

During the health screening program, utmost detailed attention is provided by the professional staffs of the center from smooth progress of the different tests and the procedures, up to the complete uneventful recovery of the patients, the analytic process and the final consultation/recommendation process with our consulting physicians.

Our physicians of the **Health Promotion Center** will personally discuss the test results and our recommendation of the health related issues of each patient at the final phase of the evaluation.
